TECHNOLOGIES

Strong: JavaScript, React, jQuery, HTML5, CSS3, PHP, OOP, Bootstrap, Materialize, APIs, Flexbox	**Experienced:** ES6, Axios, Node.js, Redux, MySQL, SCSS, JSX, XAMPP, UI/UX	**Tools:** Git, Github, Meistertask, Agile Development, Figma, Postman, Chrome Dev Tools, Photoshop, AWS

APPLICATIONS DEVELOPED

Pocket Statz Github. Live
Lead backend developer for a mobile app designed to check recent stats from your favorite sports teams
- Built a **MySQL** and **PHP** backend to store and retrieve data obtained through **cURL** requests
- Incorporated **Flexbox** and **Materialize** to focus on enhancing the customer's **UX**
- Set up routing to various components using **React Router**, **Redux**, and **Axios** calls

Hackathon - Let's Clean Up Github . Live
Lead frontend for a web app built in 48 hours that connects volunteers to local beach clean up events
- Made **AJAX** calls to Eventbrite, Mapbox, and OpenWeatherApp to gather info returned in **JSON**
- Handled **API** information using **JavaScript** and rendered information to the DOM using **jQuery**
- Utilized **HTML5**, **CSS3**, and **Bootstrap4** to create the framework and design for the application
- Used **Meistertask** to coordinate sprints and scrums by following the **Agile methodology**

Employee Table Github . Live
A content management system to keep track of employee information
- Dynamically created table to display employee information using **ReactJS** and **JSX**
- Constructed a **PHP** backend allowing users to use **CRUD** operations within the **MySQL** database
- Responsive on both mobile and desktop due to the **SCSS** and **Materialize** front-end

RECENT WORK EXPERIENCE

Philz Coffee / Barista   2018 - 2019
